Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of claims 1, 2, 4, 5, 7, 9, 10 and 18 in the reply filed on November 22, 2004 is acknowledged.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 2, 4, 5 and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Wu (6,045,151).

Wu teaches an occupant protection device located in a vehicle seat comprising a receiving container 58 wherein the receiving container is free of closure flaps and the opening of the receiving container is covered by a seat cover of the vehicle seat, and wherein the seat cover is fastened to a side wall of the receiving container so that, when the airbag is inflated with gas, the seat cover tears open in the region of the opening of the receiving container. The seat cover has a predetermined breaking point in the region of the opening of the receiving container. The predetermined breaking point is formed by a seam configured to tear. The seat cover is folded over into the seat interior in the region of the tearing seam forming two adjacent hems, and wherein the adjacent edge regions of the hems are sewn together. The receiving

container is arranged in the vehicle seat in such a manner that the side wall is arranged essentially parallel to the backrest and the opening of the receiving container faces the upper end of the backrest. A strip 56 is provided for fastening the seat cover to the side wall of the container.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 9 and 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wu (6,045,151).

Wu teaches the claimed invention except for a strip made of plastic. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have the strip made of plastic, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice.

Allowable Subject Matter

6. Claim 10 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 3616

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
